# Panacol expands adhesive portfolio for medical applications

**German adhesives manufacturer Panacol-Elosol presents adhesive Structalit® 5893 at this year's Medtec Europe trade fair in Stuttgart, Germany in April 2015.**

Adhesive Structalit® 5893 is Panacol's latest addition to its portfolio of adhesives for medical applications. The black potting compound has been specially formulated for bonding metals and stainless steel. Structalit® 5893 has already proved successful as a black encapsulant in electronic applications, as well as for bonding and encapsulating injection devices for veterinary medicine. The adhesive is based on epoxy resin with excellent resistance to moisture and thermo-shock.

Germany-based Panacol-Elosol GmbH, a member of Hoenle Group, is a leading manufacturer of industrial and medical grade adhesives.

**Visit us at Medtec Europe from 21 to 23 April 2015 in Stuttgart at stand no. 7C 28!**
